

Regional Centre on Information Communication Technology

CeRICT srl and its activities

The “**Regional Centre on Information Communication Technology CeRICT srl**” is a company that acts in Information and Communication Technology (ICT) domain, with particular focus on the applied research projects.

CeRICT headquarter is placed in Benevento, town located in the middle of the **Campania Region**.

As CeRICT supplies services and products, it represents the ideal partner of public and private firms, which innovatively use the ICT.

CeRICT with **more than 220 professors, researchers and specialized technicians**, aims at consolidating its role as “interface” between research field and the industrial one, in order to match technological demand and technological supply.

The following structures are associates in CeRICT Srl:

University of Salerno, University Parthenope of Naples, University Federico II of Naples, University of Sannio, Second University of Naples, National Interuniversity Consortium of Informatics, CNR (National Research Council) and Pascale Foundation.

Main CeRICT purposes are to:

- realize research and development activities stimulated by interests of firms and followed by proper technological transfer;
- sustain new knowledge-based firms emergence and academic spin-offs;
- sustain professional technological consultancy demand;
- support and realize specialized training activities.

Main stakeholders of CeRICT innovative reality are:

- Campania Region (Institutional Organism that manage the whole country Region);
- the whole productive sector involved in ICT domain (both big and small and medium enterprises; both individual and joined firms).

Technological transfer of scientific research outcomes and creation of new productive realities by academics spin-offs processes or particular emergences of start-ups represent the core performances of CeRICT activities.

Collaboration between CeRICT and industrial sector follows a structured routine based on four phases:

Discover - its aim is selecting and formulating potential proposal of projects; the result allows the CeRICT Management to evaluate the proposal and, eventually, submit it to the define phase;

Define - its aim is specifying and developing the content of project to be presented to customers or public Institutions;

Confirm - its aims is to support all the activities leading to the agreement signature;

Deliver - its aim is to realize the project and to manage all the activities until project close down (i.g. storyboard, benchmarks, close down).

CeRICT represents an important actor involved in 3 out of 5 aims of “Cadre Programme Accord for the ICT Metadistrict creation”, **significant Agreement between Campania Region and Italian Republic Government** for the realisation of many industrial research projects in ICT domain and for the emerging of “ICT Metadistrict”.

CeRICT Localization

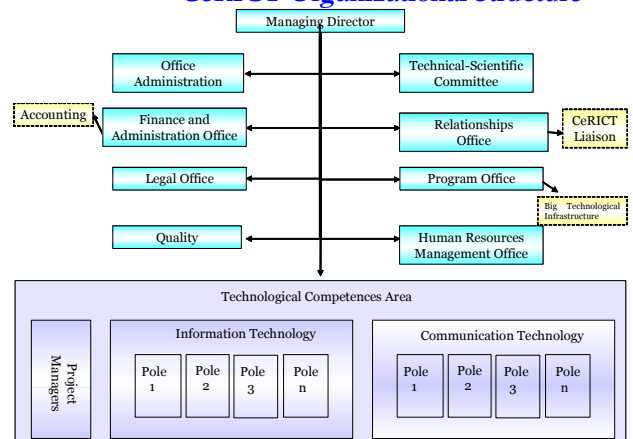

CeRICT has an **innovative organizational structure**, that provides integrated competences; it prefigures a real integration in associated projects among different actors, relying on creativity, **common planning vision, risks sharing, and continuous innovation**.

Resources and competences of Technological Competences Area can be classified as following:

- **IT Competences** (Information Technology);
- **TLC Competences** (Telecommunications Technology).

Nowadays, this configuration is very attractive, since the convergence and interaction processes between university, industrial sector and institutions is increasingly requested.

CeRICT Organizational Structure

CeRICT has obtained the certification:

- **ISO 9001:2000 Quality Management Systems.**
